

## ECOMEGA® UPCYCLED EPA AND DHA

ECOMEGA® is the latest offering from KD Nutra®.

As one of the largest processors of Omega oils globally, we have launched ECOMEGA® **upcycled Omega-3** concentrates to help tackle the global issues of sustainability and food waste.

ECOMEGA® delivers your brand a high-quality dietary supplement ingredient that is sustainable and ecologically sound. ECOMEGA® is designed to prevent food waste while delivering a **high-quality sustainable Omega ingredient** for dietary supplements. To make ECOMEGA® upcycled Omega concentrates, we carefully select lower-concentration EPA and DHA side fractions from our manufacturing of ultra-high purity concentrates for API pharmaceutical applications and nutritional Omega-3 ingredients.

In the process of manufacturing EPA and DHA concentrates above 90%, it is common to have lower-purity side fractions. In the past, these side fractions would normally be blended down in Omega concentration and sold into animal feed, aquaculture, and fuel markets.

With ECOMEGA®, we preserve the **high quality and nutritional value** of the Omega-3s sourced from precious fish and algal sources and ensure the highest and best use for these important nutrients.

We combine multiple raw material sources from both fish and/or algae sources into an upcycled Omega product that matches the EPA and DHA content for several common medium grade Omega concentrates. All ECOMega® products **comply with GMPs for dietary supplements** and meet standard oxidation parameters and impurity profiles as set forth in the GOED Monograph.

We offer commonly sourced concentrates from **30% to 60%** in both **EE and TG** form. Choosing ECOMega® allows your brand to maximize your commitment to sustainable sourcing and preventing food waste.

ECOmega® Upcycled EPA+DHA	EPA (mg/g)	DHA (mg/g)	EPA + DHA (mg/g)
ECOmega® EPADHA300TG	n/a	n/a	300
ECOmega® EPADHA500EE	n/a	n/a	500
ECOmega® 300200EE	300	200	500
ECOmega® 1050TG	100	500	600

ECOmega® fish+algae concentrates bring an alternative and sustainable choice for sourcing Omega-3s utilizing upcycled fish and algae concentrates in a repurposed eco-conscious.

Let's start bringing your product concept to life today!
